

## THE EXPLORER

Multi-crew explorer that has more than earned its long-standing status as the go to pathfinder for both military and civilian services. It is built as a single, self-sustaining ship that can make long duration voyages through the roughest areas of space. It's designed specifically for transiting jump points, dealing with extreme conditions in space and getting back home.

Since its time in the UEE Navy, it has been the vanguard of every UEE exploration effort in recent years. Combined with the high-tensile hull armor, is one of the safest exploration ships in the galaxy. The Carrack is now declassified and it is available for civilian use.ultrices gravida.
